### **We promote the basic design concepts:**

1. **Contrast**  
Size, color, weight, opacity, etc  
Creates a hierarchy of importance
2. **Repetition**  
Repeat similar elements (colors, shapes, sizes, etc) to make the design cohesive and balanced
3. **Alignment**  
All elements should have a locational relationship to each other (lined-up)  
Directs the flow and direction of the user's focus
4. **Proximity**  
Groups similar components for clearer definitions  
"Blocks" of ideas make a more interesting layout and will more likely hold the users attention

The image shows the front cover of a book titled "Web Development In 2018: A Practical Guide". The title is in large blue letters, and the subtitle is in smaller grey letters. The author's name, "Traversymedia.com", is at the bottom right. The book is set against a dark background.
